JAYAVARDHAN MALAMANTI

B.Tech Student | Aspiring AI & Full-Stack Developer
Chennai, Tamil Nadu, India | 7780508404
GitHub | LinkedIn | LeetCode | Mail

PROFESSIONAL SUMMARY

Second-year B.Tech student at AMET University with hands-on experience building AI-powered applications, including a RAG chatbot and a study assistant chatbot. Skilled in Python, C++, and full-stack development with React.js, Node.js, and MongoDB, with working knowledge of LLM fine-tuning (LoRA), Hugging Face, and local model deployment. Seeking AI, Software Engineer, and Full-Stack Developer internship roles.

TECHNICAL SKILLS

Programming Languages: Python, C++
Frontend Development: JavaScript (ES6), React.js, HTML5, CSS3
Backend Development: Node.js
Databases: SQL, MongoDB
AI / Machine Learning: RAG, LangChain, LoRA, Model Fine-Tuning, Hugging Face, Local Deployment of Models
Developer Tools: Git, GitHub, Visual Studio Code
Core Concepts: Data Structures & Algorithms, Object-Oriented Programming, REST API Integration, Problem Solving, Responsive Web Design

PROJECTS

RAG Chatbot — Document Q&A | Python, LangChain, Vector Database, LLM

- Built a Retrieval-Augmented Generation chatbot that answers questions grounded in custom documents rather than relying only on a model's built-in knowledge.
- Implemented document ingestion, chunking, embedding, and semantic retrieval pipelines using LangChain.
- Designed prompts and retrieval logic to produce accurate, context-aware responses.

Study Assistant Chatbot | Python, LLM

- Developed an AI study assistant that helps students understand topics, answer questions, and revise concepts.
- Integrated a language model with a user-friendly interface for interactive, conversational learning.
- Focused on clear, helpful responses tailored to student queries.

Queue Management System — Smart Queue SaaS

- Built a smart queue management SaaS with QR code token generation, live queue tracking, real-time notifications, and role-based access control.
- Developed backend logic and REST APIs for adding, serving, and monitoring queue entries.
- Created a responsive interface for smooth use across devices.

EDUCATION

AMET University Aug 2025 – Present
B.Tech in Computer Science and Engineering (C.S.E) — 2nd Year

ADDITIONAL EXPERIENCE

- Explored fine-tuning of language models using LoRA for efficient, low-resource customization.
- Experimented with deploying and running AI models locally, and learned about Hugging Face for working with open-source models.

CODING PRACTICE

Completed the 30-Day LeetCode Challenge, solving Data Structures & Algorithms problems to strengthen problem-solving skills.
